

SAFETY GATES AND RAILINGS

SWING GATES

Code	Description
SGT/S	Swing gate & latch post (up to 4.0m length)
SGT/L	Swing gate & latch post (4.1m to 6.0m length)
SGRP	Removable latch post (central)

PWS swing gates are ideal for securing vehicular entrances. They feature rigid, galvanised steel construction, sturdy inground mounting posts and a gate with bearing mounted pivot points to ensure easy movement.

- Standard gate is supplied with posts for padlocking closed
- For openings of 6+ metres we recommend using two gates
- Bolt down mounting option available, please enquire
- Site measure and installation service available

Optional extras:

- Sign panels for advertising
- Latch posts for locking in the open position, secure padlock housing

Code	Description
SGLP	Extra latch post
SGSP	Sign panel

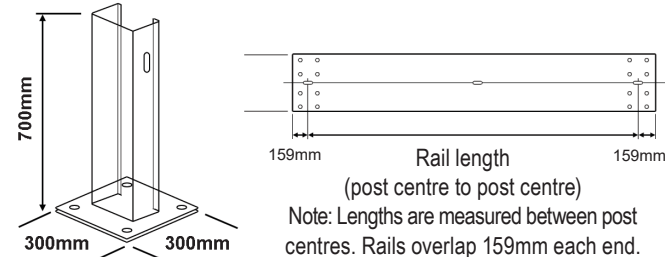

W-BEAM GUARD RAIL SYSTEM

This guardrail system offers economical protection against damage to property, buildings or vehicles. It is widely used around car parks, loading docks and warehouse environments.

- Damaged sections can be replaced if required
- Select rail lengths, in-ground or bolt down posts, fish tail/bull nose ends
- Hot-dip galvanised finish for maximum corrosion protection

Code	Description	Code	Description
GDW1.0	1.0m rail	GDWFT	Fish tail end terminal
GDW2.0	2.0m rail	GDWCP	Car park terminal
GDW2.5	2.5m rail	GDWPB	M16 post bolt/ nut
GDW4.0	4.0m rail	GDWSB	M16 splice bolt/nut
GDW5.0	5.0m rail		
GDWBP	Bolt down post	GDWIG	In-ground post

Specifications:

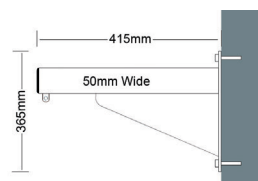

Material	Mild steel
Finish	Hot dip galvanised
Height	Approx. 700mm to top
